## Mountain Jam

**The Creston Valley was the place to retire after a thirty year career with Water Survey.**

**Upon my arrival to Creston, I was into relaxation mode for close to two years. I did get into curling and bowling as a means of meeting people, then last summer it was time to purchase a sailboat.**

**In February of 2009 I heard the call for volunteers from CIDO. Being involved with music seemed like the perfect fit for me as I have spent my whole adult life checking out live music. I prefer the small clubs, although I have seen some great acts in the huge arenas. A chance to play the music that I love over the airways is something I never really thought of, until that chance meeting at CIDO.**

**I am one of the latest programmers to join the CIDO team. My program is based on the jam, a melting pot per se. Remarkable music brought together from jazz, blues, country, roots, world, rock and more. To showcase the hidden gems, not necessarily the typical songs on an album. My goal is to broaden the musical horizons of the listener and myself. Hope you enjoy my show *Mountain Jam*.**
